(54) Addition of additives to polymeric materials.

(57)

A process for introducing pigments or nonpigment colorants or stabilizers or mixtures thereof into a polyamide or polyester melt, comprising: a) feeding an additive in a liquid vehicle containing volatiles into a twin screw vented extruder which is extruding a polymer melt stream; b) mixing the polymer and additive in the extruder; c) removing the volatiles from the resulting mixture while in the extruder; and d) extruding a resulting substantially homogeneous polymer and additive melt.
